DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 and 15-29 allowed.
2. Claims 9-11 and 14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 8 and 12-14 rejected under 35 U.S.C. 102(e) as being anticipated by Achuthan et al. (6,756,643).

Regarding Claim 8, Achuthan et al. disclose a dual silicon layer for chemical polishing planarization where in Figs. 3 and 8, it discloses a buried oxide layer 120 over a substrate 110, a first fin structure 810 positioned on buried oxide layer 120, a second fin structure 802 positioned on buried oxide layer 120 where spacers 310 adjacent only first fin structure 810. As to the requirement that the gate insulator layer covering full length of second fin structure, second fin structure 802 is a dummy fin which is itself made out insulating material.

Art Unit: 2826

Regarding Claim 12, first and second fin structures 810 and 802 have the same physical size.

Regarding Claim 13, layer 820 is a gate conductor/polysilicon material that is placed on first and second fin structures.

Regarding Claim 14, layer 140 is gate insulating material extending over first fin 810 not covered by the spacers.
